ADA C.E.R.P.[®] | Continuing Education
Recognition Program

DKU is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. DKU designates this activity for 30 continuing education credits. Concerns or complaints about a CE provider may be directed to the provider or to ADA CERP at www.ada.org/goto/cerp.

THE PROGRAM

Thursday, November 10, 2011

"Pulp Fiction a.k.a. Truth Decay"

Arthur "Kit" Weathers, DDS – Griffin, GA – Discover the secrets of single-visit endo. Forget what you have learned before – multiple visit endo just gives bacteria an opportunity to thrive between visits. Here is just a taste of what you will learn: The one mistake in endodontics that almost every dentist makes – and how to avoid it • How to assure you will never start a root canal you won't be able to finish • Root canal cleaning and shaping • Localization of elusive tooth pain • Greater accuracy in your delivery of local anesthesia, infiltrations and blocks • How to avoid breakage of your rotary nickel-titanium files. After completing this seminar, the participant should be able to: Identify the difference between reality and illusion "Pulp Fiction" • Identify out-dated concepts and avoid "Truth Decay" • Identify an endodontic preparation that works, with proper case selection, on virtually every tooth • Be diagnostically competent and know when to refer • Define a technique to simplify emergency treatment for endo cases • Utilize a new technique for obturating root canals that will increase efficiency of care for your patient. Dr. "Kit" Weathers is a clinician, author, inventor and international lecturer, recognized as one of the Top Clinicians in Continuing Education by Dentistry Today. Dr. Weathers has lectured worldwide on technologies, products and processes designed to simplify the practice of endodontics for the general dentist. This course is co-sponsored by educational grants from Dentsply, Delta Dental, PDAIS, Hayes Repair and Dodd Dental Lab.

Thursday, December 8, 2011

"Why are Women So Strange and Men So Weird"

Bruce Christopher, PhD – Minnetonka, MN – At the heart of any practice are relationships: between staff, patients, and doctors. It is no doubt that communication runs your office! This session takes a very hilarious look at how men and women think, speak, and make decisions differently. You will revitalize performance and morale by applying the strategies outlined in this seminar. You will laugh 'til you cry and learn 'til you change as you find out what makes the opposite sex tick! Your people and your practice will realize the following benefits: Increase communication effectiveness and recapture lost time from the clutches of communication misfires • Increase conflict resolution skills and apply a strategy that really works at work • Reduce the potential for miscommunication • Create a re-energized working environment and a positive practice culture • Dazzle your patients by learning how to speak their language • Increase case acceptance rates • Defuse potential conflict situations by understanding the underlying gender-specific differences which "fuel the fire of fights." He is a practicing supervising Clinical Psychologist holding degrees in Professional Psychology and Interpersonal Communications. He speaks over 150 times each year and is one of today's most sought after speakers in the Fortune 500. This course is designed for the entire team and spouses! This course is co-sponsored with educational grants from Dentsply, Hayes Repair and Dodd Dental Lab.

Wednesday, January 11, 2012

"Essential Anterior Dentistry: Digital Portrait to Completed Case"

Martin B. Goldstein, DMD – Wolcott, CT – This seminar presents a relaxed but detailed overview of current day anterior dentistry techniques with an emphasis on developing a streamlined approach. Attention is paid to a methodology (Templates for Success) that takes the guesswork out of delivering anterior dentistry as well as the basic digital photographic methodology needed to participate in the process. Special emphasis will be placed on a unique, laboratory assisted method of delivering direct composite veneers minus the stress of hand sculpting. Comfort Zone Cosmetics is an excellent "re-entry" for the practitioner having drifted away from anterior dentistry or for those desiring greater involvement in one of dentistry's most satisfying endeavors. Participants will learn about: Digital photography • "Paint by number" approach to smile makeovers • Tooth preparation, impression taking and temporization • Stress free case delivery methods • The other veneer: direct composite veneers. Dr. Martin Goldstein is a Fellow of the International Academy of Dento-Facial Esthetics. Recognized as a Dentistry Today Top 100 CE Leader for the last six years. He lectures and writes extensively concerning cosmetics and the integration of digital photography into the general practice. A contributing editor for Dentistry Today, he has also authored numerous articles for multiple dental periodicals both in the US and abroad. Bring your entire clinical team! This course is sponsored with a major educational grant from Dentsply and cosponsors Delta Dental, Hayes Repair and Dodd Dental Lab.

Friday, April 13, 2012

"But Aren't They Just Baby Teeth"

Gregory L. Psaltis, DDS – Olympia, WA – You've heard these words before and can't help thinking to yourself, "Oh no, another ignorant parent." Parents who pose this question (and others) are not really ignorant - they are often working from old beliefs or their own experiences. The ability to answer these common questions insures a greater understanding of the pediatric dental issues at hand and creates a positive relationship through effective communications. Topics included are primary anterior trauma, "rotten teeth," timing of initial examinations, specific clinical material such as primary anterior and permanent posterior restorations, primary pulp therapy and stainless steel crowns. Practitioners who treat children will benefit from this engaging course. It will incorporate many aspects of both behavior management as well as clinical skills. You will learn procedures that you can apply in your offices the next day. This is a broad-spectrum program that has just enough humor in it to keep you entertained and still focuses on real pediatric issues and valuable clinical techniques. Dr. Psaltis received both his dental degree and his Certificate of Specialty, Pediatric Dentistry, at the University of California, San Francisco. He is a much sought after international speaker and widely published author. He maintains a full time pediatric practice. This course is co-sponsored with educational grants from Dentsply, Delta Dental, PDAIS and Dodd Dental Lab.

Friday, May 4, 2012

"The Prosthodontic Sextett for Esthetic Longevity and Success"

Fritz Kopp – Zurich, Switzerland – For esthetic reasons a restorative margin must still be carried subgingivally. Its adverse impact on the periodontium due to factors such as improper margin placement, violation of the biologic width or inadequate emergence profile is well known and has been abundantly discussed in the literature, but has often been insufficiently explained as to how to be avoided during clinical procedures. The meticulous performance of the different clinical steps during restorative work such as tooth preparation, provisionalization, impression taking, try-in, and final cementation will be elaborated, leading to more predictability and longevity in esthetics. Pertinent clinical details are presented which can be built into your own treatment concepts and utilized tomorrow. The objectives of this seminar are as follows: Present a refined clinical treatment concept for long lasting anterior crowns • Understand the nature and behavior of the collagen fibre bundles • Use the physiologic tooth mobility for precise crown cementation. Dr. Kopp received his dental degree in 1975 from the University of Basel School of Dentistry, Switzerland, where he started his post-graduate training in Operative Dentistry and Periodontics. He also completed postgraduate programs in Fixed and Removable Prosthodontics. Since 1984, he has maintained a private practice for Perio-Prosthodontics in Zurich. Dr. Kopp has given lectures and clinical courses internationally. This course is co-sponsored with educational grants from Dentsply, Delta Dental, Hayes Repair and Dodd Dental Lab.

Those Taking The Full DKU Series will receive both Bonus Courses

BONUS #1 Wed., Oct 26, 2011

(at Valley Forge Radisson Hotel)

BONUS #2

**Wed - Thurs - Fri
Mar 7, 8, 9, 2012**

Hands-on Courses are not available for free. To register for these courses contact VFDC.org

Members choose one course from the Valley Forge Dental Conference

John Molinari, PhD – "Infection Control for the Dental Office"

- Wed., Mar 7, 2012** –
